The American Golfer (June 1914)

Under the provisions of 37 CFR 1.98(a)(2), a legible copy of each United States and foreign patents cited is attached hereto.

Under the provisions of 37 CFR 1.98(a)(2)(ii), a legible copy of each publication or that portion which cause it to be listed, if such is listed, is also attached hereto.

Under the provisions of 37 CFR 1.98(a)(3), the following is a concise explanation of the relevancy, as it is presently understood, by the individual designated in Section 1.56(c) most knowledgeable about the content of the information, of each patent, publication, or other information listed that is not in the English language. The concise explanation may be either separate from the specification or incorporated therein.

This application is a Reissue of U.S. Patent No. 5,938,541, which along with U.S. Patent No. 5,888,149, and Design Patent No. Des. 399,281, were originally the subject of a patent infringement complaint in *Vardon Golf Company*,

Inc. v. Karsten Manufacturing Corporation, No. 99 C 6934, U.S. District Court for the Northern District of Illinois, Eastern Division. Most of the patents and publications cited above were cited as prior art in this *Vardon v. Karsten* case, and the remaining were found in a search conducted by the applicant in the Fall of 1997, which was a general state-of-the-art search.

Under the provisions of 37 CFR 1.98(3)(i), the Patent Owner states that the relevance of each of these documents is that they show golf club heads with ferrules surrounding the hosel at the lower end of the shaft mounted in the hosel. Since most of these documents were cited by *Karsten's* attorneys in the above case, and they have not, as yet, explained what they believe to be the relevance of any of these references, the Patent Owner cannot provide the Patent Office with an explanation of the relevance of each as presently understood by the Patent Owner.

Furthermore, the Patent Owner states in further explanation under 37 CFR 1.98(3)(i), that none of the documents listed above is believed by the Patent Owner more pertinent to the invention than one or more of the following patents and publications cited during the prosecution of U.S. Patent Nos. 5,938,541 and 5,938,541.

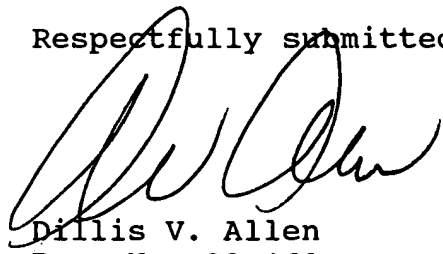

Inventor	U.S. Patent No.	Issue Date
Flint	1,480,056	1-8-24
